## HMS +

Programmer: Dr. Bill Hazelton
Date: March, 2005.

| Line | Instruction | Display | User Instructions |
| :---: | :---: | :---: | :---: |
| D0001 | LBL D |  | Enter first angle. Press ENTER. Enter second angle. Press XEQ D. <br> (Angles in DDD.MMSS format) <br> Angle sum displayed (in HP notation) |
| D0002 | $\rightarrow$ HR |  |  |
| D0003 | $\mathrm{x}<>\mathrm{y}$ |  |  |
| D0004 | $\rightarrow$ HR |  |  |
| D0005 | + |  |  |
| D0006 | $\rightarrow$ HMS |  |  |
| D0007 | RTN |  |  |

## Notes

(1) General program to add two angles, bearings or directions in DDD.MMSS format (HP notation), and produce a result in the same format.
(2) Key in the first angle. Press ENTER. Key in the second angle. Stack will contain:

| Stack Register | Contents |
| :---: | :--- |
| T |  |
| Z |  |
| Y | First angle in DMS |
| X | Second angle in DMS |

Press XEQ D. The sum of the two angles in HP notation will be in the X register.
(3) Negative values will work correctly.

## Sample Computation

$123^{\circ} 45^{\prime} 56^{\prime \prime}+321^{\circ} 54^{\prime} 32^{\prime \prime}=445^{\circ} 40^{\prime} 28^{\prime \prime}$

## Storage Registers Used

None

## Labels Used

Label D

$$
\text { Length }=21
$$

$$
\text { Checksum }=90 \mathrm{C} 4
$$

Use the length ( $\mathrm{LN}=$ ) and Checksum ( $\mathrm{CK}=$ ) values to check if program was entered correctly. Use the sample computation to check proper operation after entry.

## HMS-

Programmer: Dr. Bill Hazelton
Date: March, 2005.

| Line | Instruction | Display | User Instructions |
| :---: | :---: | :---: | :---: |
| E0001 | LBL E |  | Enter first angle. Press ENTER. <br> Enter second angle. Press XEQ E. <br> (Angles in DDD.MMSS format) <br> Angle sum displayed (in HP notation) |
| E0002 | $\rightarrow \mathrm{HR}$ |  |  |
| E0003 | $\mathrm{x}<>\mathrm{y}$ |  |  |
| E0004 | $\rightarrow$ HR |  |  |
| E0005 | $\mathrm{x}<>\mathrm{y}$ |  |  |
| E0006 | - |  |  |
| E0007 | $\rightarrow$ HMS |  |  |
| E0008 | RTN |  |  |

## Notes

(1) General program to get the difference between two angles, bearings or directions in DDD.MMSS format (HP notation), and produce a result in the same format.
(2) Key in the first angle. Press ENTER. Key in the second angle. Stack will contain:

| Stack Register | Contents |
| :---: | :--- |
| T |  |
| Z |  |
| Y | First angle in DMS |
| X | Second angle in DMS |

Press XEQ E. The difference between the two angles in HP notation will be in the X register. The second angle will be subtracted from the first.
(3) Negative values will work correctly.

## Sample Computation

$321^{\circ} 54^{\prime} 32^{\prime \prime}-123^{\circ} 45^{\prime} 56^{\prime \prime}=198^{\circ} 08^{\prime} 36^{\prime \prime}$

## Storage Registers Used

None

## Labels Used

Label E

$$
\text { Length }=24
$$

$$
\text { Checksum }=7 \mathrm{DAF}
$$

Use the length ( $\mathrm{LN}=$ ) and Checksum $(\mathrm{CK}=)$ values to check if program was entered correctly. Use the sample computation to check proper operation after entry.

Clear Stack
Programmer: Dr. Bill Hazelton
Date: March, 2005.

| Line | Instruction | Display | User Instructions |
| :---: | :---: | :---: | :---: |
| C0001 | LBL C |  | Press XEQ C. |
| C0002 | CL x |  |  |
| C0003 | R $\downarrow$ |  |  |
| C0004 | CL x |  |  |
| C0005 | R $\downarrow$ |  |  |
| C0006 | CL x |  |  |
| C0007 | R $\downarrow$ |  |  |
| C0008 | CL x |  |  |
| C0009 | RTN | 0.0000 |  |

## Notes

(1) General program clear the 4-register stack in the calculator. This is a useful thing to do before starting some computations, but the HP-33S has no in-built function to do this.
(2) Press XEQ C. The stack will be set to all registers containing zero. The stack will contain:

| Stack Register | Contents |
| :---: | :--- |
| T | 0.0000 |
| Z | 0.0000 |
| Y | 0.0000 |
| X | 0.0000 |

## Storage Registers Used

None

## Labels Used

Label C Length $=27 \quad$ Checksum $=8 \mathrm{E} 87$
Use the length ( $\mathrm{LN}=$ ) and Checksum ( $\mathrm{CK}=$ ) values to check if program was entered correctly. Use the sample computation to check proper operation after entry.
